Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking.Today, National Geographic Maps continues this mission by creating the world’s best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

The Nat Geo Trails maps are the most detailed available for driving back woods trails as well as hiking. A year or so ago they were available on line by subscription so custom maps could be

prepared of each trip. This took care of the minor problem of the physical size of the map sheets.

There are better map products out there if you are an off-highway vehicle enthusiast. I ride dual sport bikes and got better info online and at the Moab visitor center. Save your money! Probably OK for hiking...

Great maps but haven't been updated in about 3-4 years based on lack of newer MTB trails...Navajo rocks, etc.

great bundle needed for Moab

It's going to hold up to abuse in a pack. It includes some of the canyonlands area - if I had known I wouldn't have bought that map separately. Take a look and see if this one works before buying that one. Map is not as detailed with lesser known spots but still worth having if you're travelling in that area. Great for four-wheelers and bikers.

Moab south and Moab north are a must to have if you are going to hit the back country in Moab. Great investment!

Great map

I love maps! But really, if you are visiting the Moab, UT area, these are great and have a ton of routes and trails many have mileage for each section of trail and such as well!
