Age Range: 7 - 10 years
Grade Level: 2 - 5

Customer Reviews

Gr. 3^-6. Designed as a field guide, this colorful book devotes a page to each of 30 creatures, such as the spring peeper, the Great Plains toad, and the box turtle. Readers will learn what the animal looks like, where it lives, what it sounds like, what it eats, and (in small, decorated sidebars) "Interesting Facts," one per page. Another little box contains a warning or a bit of advice, ranging from the useful ("DO NOT TOUCH. This turtle bites hard and fast!") to the obvious ("Don't leave behind any litter"). Each section of the book begins with a general introduction and ends with an easy craft project. The five "Scrapbook" pages, bordered but otherwise blank, may invite unwanted scribbling. Sturdier and more attractive than most paperbacks, this wide-format book has sewn signatures, glossy pages, and several small line-and-wash illustrations on each page. Despite its drawbacks, the book presents useful information in an attractive format. Carolyn Phelan

We purchased this book (and several others like it, but different topics) for our grandchildren. My husband and I both looked at them when they came and we loved them ourselves! The pictures are great and the print is the perfect size. I think it gives enough information, but not too much information. It’s not so long that the kids will get bored before they are finished reading it.

Realistic drawings of frogs, toads and turtles will help children from Pre-K through Grade 4 identify small woodland creatures. Contains drawings and text on each page with crafts on last two pages. I especially like the text boxes which give children good tips, such as, "Be kind to animals." This series if terrific for children interested in nature. Several books in this series kept my 4yo granddaughter busy for a long drive. I would highly recommend.

I love this book, the illustrations are great and information is awesome. Not just a field guide also has fun craft or art ideas for kids. The back has a view pages to put photographs. At first I thought the back was for sketches but the paper is too glossy to do that. Overall this was a great book in our homeschooling when studying frogs, toads, and turtles.

Good addition to my fiction/informational text unit on Frogs and Toads. It is great for those second graders who love to "make collections" from their real life adventures.

Very well written with beautiful pictures. My 7 year old granddaughter is an outdoor princess who isn’t satisfied with merely seeing things - she wants to know what she’s seeing & some information about it. This entire series of books does just that. Makes identifying very easy & gives factual information in just the right amount for elementary age children . Highly recommend!

Perfect for my grandson, lover of all things wiggling.

Our newest class pet is a frog, the students loved this book full of information! The book also has an Accelerated Reader comprehension test available.
