Customer Reviews

"For students of chiropractic and manual therapy, Bergmann (chiropractic methods, Northwestern Health Sciences U.) and Peterson (chiropractic sciences, Western States Chiropractic College) outline the basic principles needed to evaluate, select, and apply specific procedures, with an emphasis on thrust techniques. They cover chiropractic history, anatomy and biomechanical principles, joint examination, manipulative mechanics, the application of mobilization and traction, and adjustive techniques for the spine, pelvis, and extremities. This edition has updated and expanded content on joint assessment, joint subluxation/dysfunction, adjustive mechanics, and sacroiliac articulation, and updated and modified procedures, and it names each of the adjustive procedures following patterns used by the US National Board of Chiropractic Examiners. Access to how-to videos of about 300 procedures is provided online." - Book News, Inc.

This review is only for the kindle version of this Book, the book itself is in depth and closer to a 5 star, but I've been using this kindle version for just a little while and some of the links you click on take you to the wrong figure in the book, overall it just isn't as easy to navigate around as I would think the paper book would be. I am using an ipad to view the book, I'm not sure if that makes a difference.

This is my second purchase as I had the 2nd edition before. Through well documented, goes through all aspects from mechanics to examination to technique. The best technique book out there.

Great book for the Chiropractic student, it just needs a serious update and overhaul of the

photographs which are circa 1980’s era. All in all a great purchase though!

the book is great, but i cant find the videos

Exactly what I wanted and also a board required text for those students who may need to take boards in the near future.

Hi there... cant see the link to the video... pls provide the link for kindle version

Exactly the book I needed! It was perfect. Thanks!

Excellent quality, quick responds.
