Synopsis

Food plants have their own ornamental value, adding harmony to existing landscapes without creating a separate vegetable garden. They also provide a fresh, healthy alternative to the tasteless and woody fruits and vegetables bred for long-distance transportation and shipped to our grocery stores from all over the world. In this book, we show how, with just a little effort, you can augment your landscape with edibles of every description in an environmentally sustainable manner:* Veggie favorites: tomatoes, lettuce, carrots, beans and onions* Berries: blueberries, raspberries, blackberries and strawberries* The superhealthy: flax, broccoli, kale and garlic* The oddly beautiful: Brussels sprouts, kohlrabi, asparagus and artichokes* The ancient and exotic: quinoa, fennel and hardy kiwi* Plus starting, maintaining and harvesting an edible garden, propagation and winter care, and solutions to common garden problems.

Customer Reviews

MARIANNE BINETTI has a syndicated gardening column that reaches more than one million readers, and she contributes to several national magazines. She is a regular guest on HGTV and is also a popular speaker at garden centers and horticulture societies throughout Washington and Oregon.ALISON BECK has gardened since she was a child. She has a diploma in Horticulture and a degree in Creative Writing. Alison is the co-author of several best-selling gardening guides, and her books showcase her talent for practical advice and her passion for gardening.

After checking out a book over and over from the library, I just said to myself, "Just buy the darn thing!" Found a great used copy at a good price. Arrived on time and in excellent condition. Will order again from this vendor.

Pretty good book. Informational. Use it for reference now.

I found this book to be much too general and superficial. I read Binetti’s column in my local newspaper and was hoping for more specific tips and information .... as an advertising blurb implied.

I liked that this book gives you great information on plants that will grow well in my area. I can’t wait to try out some if the suggested plants.
