Synopsis

NEW RELEASE! Build your own indoor greenhouse with this step-by-step guide! This book will show you exactly how to create your own indoor micro-environment, perfect for showcasing specimen plants, using as a propagation chamber, or growing rare orchids. The book includes 132 pages of detailed drawings, measurements, supply lists Ã¢â ¬â • even a one-page glass worksheet to take to your glass cutter or hardware store Ã¢â ¬â • so you can quickly and easily build your own functional mini greenhouse. The structure measures 4 feet wide by 2 feet deep, stands about 6 feet tall, and costs less than $500 dollars to construct. The plans are fully customizable, too, so you can add or subtract features, based on your needs. Detailed lighting requirements for most plants Recommended species lists Supply checklists Detailed architectural blueprints Reference information Design inspiration samples Exact measurements for all design steps Electrical components and recommendations 265 full-color photographs and illustrations Perfect for isolating or quarantining plants, harvesting medicinal herbs, over-wintering plants, and showcasing prized specimens.
