Synopsis

Although far fewer Wolseley versions of the BMC cars were built, compared to the likes of Austin and Morris, the Wolseley cars are probably the most easily recognized with their illuminated radiator badges and unique front grills.Illustrated in full color and with detailed information on color schemes, optional equipment, and technical specs, this book provides a complete history of the cars from 1948 to the end of production in 1975. This is the ultimate book for those interested in the later cars which so often other books only cover briefly.

The narrative well describes all the cars... The photographs used are of good quality and illustrate the variant and, importantly, a wide range of colour ways.- Wolseley World.
