## Synopsis

There is no shortage of weapons you can buy to support your survival efforts. From .22 rifles that breakdown to fit in a backpack to powerful subcompact handguns that can easily be carried concealed. There are many options out there. This doesnÃ¢â ¬â„¢t account for the several types of knives and non-lethal weapons that can be used in a survival situation. The truth is, we donÃ¢â ¬â„¢t know how bad it will get. We donÃ¢â ¬â„¢t know what circumstances we will be handed in the event of a collapse nor what might happen to our weapons. Will we have all those high-powered weapons? Or will we have lost them to stronger forces? Could we find ourselves in some sort of containment with minimal access to items for escape and protection? The idea behind this book on overlooked survival weapons is to offer up some examples of everyday items that can be used as weapons if you do not have access to those weapons you plan to use. It is also to change the way you look at everyday items. You will find that many things at home and at work can be used as weapons in the event of an attack. Better to plan for that today and not when tensions are high. The specific weapons that we are going to cover include the following:Garden Tools Elbows and KneesAttackers ClothesBaseball BatKitchen KnivesHammerChainSwordsBug SprayPensBackpackWhether you learn about how to use an attackerÃ¢â ¬â„¢s clothes against them or how to use a pen as a lethal weapon, this book will cover it all. You may have never thought about aerosol spray as a weapon but it can be devastating if you know how to use it. All of this and more will be covered in this book about overlooked survival weapons.
