Customer Reviews

1st Edition, Scale - 1:1,300,000 I lived in Africa for seven years, and visited most of the continent in that time. Angola is a fascinating mixture of ethnicity and wealth. It is still climbing out of the morass of post-colonial rule, but is now as safe as any country for travellers. Its infrastructure, particularly its roads, are of uneven quality, and we hope that this map will stimulate visitors to write us of their experiences with travelling through this vast country. We have tried to include as much detail as possible, and as accurately as possible, given the uncertain nature of much of the base material. The map includes a decent inset of Luanda , the capital, and all areas designated as parkland. This is the latest ITM map related to Africa and completes our coverage of Central and Southern Africa. East Africa and North East Africa have also been completed, and we are now working on Equatorial Africa.

Good quick referenceThis is a throw back to ancient times when you traveled the world with paper maps.It may not be the most up to date AAA map but it works well in Angola.This map is very useful in Angola when WIFI or Cell towers are just not available.I use this in conjunction with my standalone GPS and the two work very well together. When traveling in Angola,

donÃƒÂ¢Ã â ¬Ã â„¢t rely on your cell phone alone. Come prepared.
