Synopsis

How to dress up a tissue box. We all have them. They are useful but plain and despite the artistic print on the box, they are plain and boring. Slip a stained glass cover over them and they become a conversation piece. Stained glass is not difficult to learn. The basic process involves marking patterns on colored glass, cutting them out with a glass cutter, grinding the edges smooth on a diamond grinder then applying a copper foil around the edges and soldering these parts together into a one piece design.A challenge for the beginner is getting consistent, accurate results. For this project we will address this problem by making four jigs. Most things that are manufactured in factories are assembled in jigs. Jigs hold everything in place for repeatable accuracy. Once you have a jig, you can make as many panels as you want with consistent, predictable results. We will also talk about direct tracing of patterns on a light box and adjusting the fit by careful grinding of mating parts.This book will guide you through the process of building four jigs, then using these jigs and step by step instructions to make three different tissue box covers.

Customer Reviews

These are simple yet beautiful ways to develop your stained glass skills. The jigs described are the real secret to avoiding frustration. Going to the effort to make the jigs once, gives you freedom to focus on the fun part of dreaming up designs and color schemes over and over again. The result is a functional household item that is actually a real work of art. The jig layout really opens up all kinds of possibilities for creativity. The patterns shown are helpful so you can see all the different styles you could pursue. I really love the tree landscape. I could extrapolate the same techniques for other stained glass projects.
