Synopsis

This concise handbook presents a summary of Earth's history over the past 4.5 billion years as well as a brief overview of contemporaneous events on the Moon, Mars and Venus. The authors have been at the forefront of chronostratigraphic research and initiatives to create an international geologic time scale for many years, and the charts in this book present the most up to date, international standard, as ratified by the International Commission on Stratigraphy and the International Union of Geological Sciences. This book is an essential reference for all geoscientists, including researchers, students, and petroleum and mining professionals. The presentation is non-technical and illustrated with numerous colour charts, maps and photographs.

Customer Reviews

"This is an excellent book and an essential reference tool for all who have an interest in the past and future evolution in our planet. ... The book is beautifully produced and well organized with maps, illustrations, charts, and photos. All are in the correct geologic colors. The hardback copy of the book at a price of $40 is an excellent investment." - Ronald Greene, The Leading Edge"Recommended." CHOICE"Don't let the title fool you. Even though it is a concise geologic time scale, no eras, periods, epochs, or ages/stages have been left out! ... a must-have book for anyone involved in the geosciences." ASP Newsletter
