Synopsis

This new addition to the Fast Facts series is a pithy guide for novice nurse educators to the development, revision, and evaluation of programs and curricula that meet the standard requirements of the National Council of State Boards of Nursing, the NLNAC, and CCNE. Applying the concepts and principles of Systems Theory, the guide moves through the development process to include evaluation procedures where decisions are based on data. It addresses the common definitions of curriculum, how to design a curriculum, and how to design courses in accordance with the organizing elements of the program. The guide covers the purposes and development of a mission statement and of a program philosophy, as well as how to select an organizational framework. Curriculum implementation and faculty development requirements are also explored, in addition to educational and program outcomes and their evaluation. Organized for quick access and ease of use, each chapter defines key terms, summarizes important points, and lists resources for additional study. Key Features: Designed for use by all nursing educators regardless of educational environment or type of learner Breaks each step of the program development process into manageable parts that build on each other Uses concepts and principles of Systems Theory to guide curriculum development and evaluation Assists new nurse educators in quickly identifying the individual elements of a program and grasping the connections between them

I could have surfed the web and gotten this info

Quick answers for curriculum development. I have used this often.

I LOVE everyone of these Fast Facts for....books. Their chunked style allows quick acess to what I need to know NOW! I have used this specific book to support points made to colleagues who are a nit reluctant to come to the 21st century in nursing curriculum.

Helpful as a place to start

Outstanding book; well written and easy to understand. This should be required reading for all Curriculum Committee members in schools of nursing.

Excellent purchase experience!

Recommend to fellow nursing faculty involved in curriculum and program development. Easy to read and follow. Like the "Fast Facts' series.

AS a new faculty member, I need all the help I can get in developing my classes. This will help!
