Synopsis

This new edition provides trainees with a comprehensive review of cytopathology, presented as multiple choice questions with answers and detailed explanatory notes. Divided into twelve chapters, the book covers different body systems including the respiratory tract, breast, thyroid, lymph nodes, liver, gastrointestinal tract, and much more. Each chapter has been fully updated and questions are in line with those trainees may encounter in American Board of Pathology examinations. Key learning points are summarised at the end of each topic. Authored by highly experienced pathologists from University of Kansas School of Medicine, the second edition of this book features 330 images, 130 of which, are new microphotographs. Key points * Second edition providing multiple choice questions and answers for trainees in cytopathology * Questions in line with American Board of Pathology examinations * Highly experienced author team from University of Kansas School of Medicine * Previous edition (9789350255599) published in 2012

Customer Reviews

Fang Fan MD PhD Professor of Pathology, Director, Department of Cytopathology Ivan Damjanov MD PhD Professor of Pathology, Department of Pathology and Laboratory Medicine Both at University of Kansas School of Medicine, Kansas City, Kansas, USA

When I first received the book, I was a little disappointed at how small it was, then I started using it and realized how much valuable, high yield material it covers. I ordered other cytology review books for board prep, and this is definitely the best one. It is up to date with current classifications and has

good pictures. Plus, the information is reliable without any obvious mistakes that I have found so far, which is very important when studying for exams. I would highly recommend it.

I really liked this book. I used it for AP/CP board review and it was appropriate, with good pictures and straightforward questions. The lab management section was very useful for both sections of the exam. An excellent price for an excellent review book. I recommended it to my friends and have lent it out multiple times.

I used it for Boards. It was a good review. Covered a lot of material. The questions seemed too easy. But then again the cytology questions on my boards turned out to be pretty straight forward.

I really enjoy this book. The questions are written quite clearly, and the facts tested seem to be incredibly high yield. I think the image quality is great, and it is good bang for your buck. I used it for RISE and Board studying, and will likely reference it again in the future.

Excellent review book. Well- written questions, lots of photos, and most importantly, good answer explanations. Covers all systems and touches the most salient points of each. Very helpful.

Great Book. Cheap. As of 12/2013 seems very up to date compared to most (for example, questions about EGFR and KRAS in the lung section). Pictures are just the right quality to simulate board questions ;)

Makes reviewing for cytology exam fun. The vast majority of the pictures are of good quality. Covers a lot of material in multiple choice question format. Obviously just a review book, you need Cibas or similar as your main text

Very well cytopathology book covering all subjects but its only MSQ questions with fully explained answers
