Synopsis

Noo-politics is most broadly understood as a power exerted over the life of the mind, reconfiguring perception, memory and attention. This volume unites specialists in political and aesthetic philosophy, neuroscience, sociology and architecture, and presents their ideas for re-thinking the city in terms of neurobiology and Noo-politics. The book examines the relationship between information and communication, calling for a new logic of representation, and shows how architecture can merge with urban systems and processes to create new forms of network that empower the imagination and change our cultural landscape.
