## Customer Reviews

Terry Des Jardins, M.Ed, RRT is Professor Emeritus in the Department of Respiratory Care at Parkland College in Champaign, IL where he taught for 35 years. He still actively lectures third year medical students on clinical manifestations and assessment of respiratory disease and cardiopulmonary physiology at the University of Illinois College of Medicine at UrbanChampaign.

required reading for school

I bought the kindle version for school. I am just starting my second year for respiratory therapist this fall and i expect to still use this book for reference. The kindle version has the actual page numbers for refence.

Great book for use in the respiratory program.

One star for  not providing accurate depictions of the book for sale. This is the ACCOMPANYING work book for the text book.

It is a pretty good and helpful book but unfortunately there's a lot of error like in spelling that can be found with this book. But over all it is a good book.

Workbooks are great in reinforcing the learning because practice makes perfect. Especially when the professor relies heavily on so many important Figures to memorize from Des Jardins, this workbook will prepare you very well!

In new condition!!!

The workbook is great to use as a study aid. It helps reinforce and memorize the material from the book and class lecture.
