Gr 4-6-Both entertaining and useful, these titles discuss different aspects of ancient Egyptian and Greek cultures and history, explaining how knowledge of these societies was pieced together by archaeological discoveries. Topics are presented on double-page spreads with generous use of color and black-and-white photographs and color illustrations of artifacts, buildings, monuments, and archaeologists at work. Hicks covers early civilizations, Classical Greece, Athens, warfare, science, transportation, and pottery. Shuter includes sections on early burials, pyramids, hieroglyphs, mummies, Tutankhamun's tomb, temples, and towns. Each book takes a fascinating look at the techniques used to study these civilizations, including an explanation of how facial reconstruction is accomplished using skulls found in tombs. Both titles offer project ideas and short biographies of archaeologists. Information is not in-depth but is adequate for reports and sure to whet appetites for

further reading. Louise James’s How We Know about the Egyptians and How We Know about the Greeks (both Peter Bedrick, 1997) also combine archaeological contributions with cultural background, but they concentrate more on daily life.-Cynthia M. Series Review: ""History Opens Windows.""These revised and updated books offer a simple overview of ancient cultures. Each 2-page spread deals with a topic such as farming, trade, everyday life, clothes and religion. Good for ESL students. RecommendedNata --Irving Independent School District

I ordered this as part of a curriculum for homeschool that we are going through with my daughter, and though it offered nice enough facts and was useful, I can think of several others that I find have perhaps even more facts presented in a more fun manner. As it was, I found this book a bit scarce and am not sure what inspired the curriculum designers to choose this over others. It’s fine and the illustrations are sufficient. It’s just not my favorite.

Ancient Egypt, a volume from the "History Beneath Your Feet" series, explores our knowledge of what life was like in ancient Egypt based on archaeological findings. I would recommend this series for elementary or middle schools and public libraries. Each page includes informative, easy to understand text with helpful explanations of more complicated concepts. Specific events, places or people are highlighted in detail boxes. Stunning color photo spreads peak reader interest. Topics covered include archaeological, forensic and preservation techniques, pyramid building, tomb design, heiroglyphs and what they mean, the discovery of Tutankhamun, and the future of archaeology using computer technology. A glossary, a full-color timeline and a detailed index make this book an excellent reference book for young readers.
