Synopsis

Guaranteed to Pass the Remote Pilot Certification Knowledge Test or your Money Back!* Pass the FAA Part 107 Remote (Drone) Pilot Certification, includes 1 year FREE Membership at RemotePilotAssociation.com with private Facebook group discussion, blog and videos. Study guide has 12 chapters and over 400 practice questions. Good for small business, corporate or government (like law enforcement)) commercial operators of small Unmanned Aerial Systems (sUAS). Don't risk not passing the FAA Remote Pilot test at a cost of $150. There are 60 questions on the FAA test with a test bank of over 300 questions. Our study guide is not your typical study guide; it's fun and efficient (sometimes blunt), not a dry textbook. Study on your own schedule. Make money with your drone! *Just send us your failing gradeÃ Â plus proof of purchase andÃ Â we will refund the cost of the book no questions asked. Qualifying purchase must be made from the publisher, WOF Media.

I did alot of digging to figure out where to start studying for the FAA Part 107 exam. I bought TC's guide and started reading it. Now I'm so engulfed in this world, I'm actually pursuing going back to school (at 41) for Unmanned Aerial Systems. TC makes this world fun, interesting and engaging. I've been scouring the internet for Part 107 resources and specifially, how to read VFR Sectional charts (flight charts) which is a major part of the exam. Of all the resources and YouTube videos I've found, they don't match this book. TC makes it easy for anybody to understand things. There is quite a bit of learning involved and it does require some dedication, but this guide is definitely the

best out there, in my opinion. He posts alot of helpful website and app links as well, which help tremendously. He's also a great person.I definitely recommend this to anybody who's looking to study for this exam. You won't be dissappointed!

I passed which means the book worked

Has over 400 hundred practice problems, however I found some incorrect answers. Be cautious if you buy this. I found their website to be hard to use and navigate.

This is an intensive study guide for anyone wanting to get their FAA certificate to use their drone for commercial operations. The guide does not assume you know anything about aviation, which is important if obtaining this certificate is your first venture into becoming a licensed remote pilot.T.C. Freeman's background as a pilot, flight instructor and aviation safety expert makes him uniquely qualified to become your instructor in helping you pass the FAA's Pilot Knowledge Quiz to obtain the rating you need as a commercial drone operator.

With FAA creating the new sUAS pilot certificate there's not much out there to cover the material required to obtain it. Mr. Freeman's study guide is comprehensive, well written and guaranteed by the author to be all you need. And it is. As a long time CFI and drone business owner this book is how I will train my new pilots.

This book is all you need to study in order to prepare for the FAA Part 107 exam. It covers everything that is necessary as per FAA study guide. Each topic is explained well and simple for everyone to understand.

Fantastic Guide very clear to read and well written. I would recommend this to any one that has an interest in becoming a Drone Pilot..
