Joanna Cole and Bruce Degen, the author and illustrator of the Magic School Bus books, have collaborated for twenty years, bringing humor and true kidlike curiosity to science and learning. Booklist heralded Ms. Frizzle as "the wackiest, wisest teacher in picture books." Two MSB titles have been named School Library Journal Best Books of the Year, and they have won countless state book awards, from New York to Nebraska.

My four year old is a huge Magic School Bus fan. This book teaches children about all kinds of

weather phenomenon and concepts, including hurricanes, clouds, atmosphere, rain, etc. The pictures have a lot of detail. The text is presented in three ways -- through a main story that is complemented by comics-style dialogue, with more scientific information on the sidebars. You can adjust the way you read the book to include more or less text and information, which makes it suitable for a wider range of ages. This book is a great way to get kids curious and excited about learning about weather. I would recommend it for ages 4-8.

Got for grandchildren , they love the book...

My son started reading this series at school, he was so interested i've kept buying the next book and he loves reading them. Great book series!

I bought this for my Magic School Bus obsessed 3 year old and it was a hit! I love that it goes into decent detail for young children and holds their attention for long periods of time. We have had to start putting my son to bed earlier because he spends at least 30 min on this book alone!

Magic School Bus is a big hit in this house. Perfect for the budding scientist!

My son loves all the Magic School Bus books, and this is a great addition to the collection!

This was a gift for my 4-year-old grandson who loves the Magic School Bus stories. He has had family members read this multiple times. He likes the descriptions of what happens with a hurricane. It ranks at the top with the book on air planes.
