Age Range: 6 - 9 years

Grade Level: 1 - 4

Customer Reviews

This book is great for all ages. Even young children can understand & will like the large pictures. My 10 year old is using it to understand each organ in detail & then assemble on a life size body.

This is a great way to teach your kiddos or students about the human body. I went a step further and decided to add dissections to go along with this book for my elementary class.

Seems pointless! Information is poor. Save your money and buy one that gives real information and doesn't beat around the bush trying to break it down to a Childs level but then it's soooo inaccurate. The body is what it is.

This is a fun little book! It is very appropriate for elementary age children, K-6. The main organs in the body, plus a few extras, are included in this book in realistic sizes. They are perfect for photocopying and coloring, then applying to a life size outline of your child/student. Most any child

would enjoy learning about each of these body parts while coloring, labeling and pasting them onto a poster. The price is excellent for what you get. This book makes it easy to make learning fun!

I'm doing a health science program at my library and bought this to make a large felt organ puzzle. I will also probably use it also to have the children trace their bodies and then color and paste their organs in. I definitely recommend this. The images are clear, easy to cut out, and has a great selection of organs.

Love this book! We use it at home and our homeschool co-op. It is informative and can be used for multiple ages. NOTE: It does contain the reproductive organs (which we have not gotten into yet with my younger children). Those pages can be skipped easily (especially if you copy the pages first).

I purchased this book for my 1st grader and she loves it! we bought a roll of brown paper at the dollar store and traced her body on it and taped it to the wall. Then we made copies of the body parts in the book (it is meant to be done that way) and added them to the body. She enjoys doing the coloring and learning about her body. There are two different versions of her body that can be done (different organs) and one book is enough for the entire family as all you need to do are make copies.

My 1st and 6th grader enjoyed doing this book together. They both now have a life size body on our school room wall, complete with internal organs and a face!
