Synopsis

The "Silver Bible" -- thoroughly revised, updated and redesigned Interior designers, architects, and other design professionals can still turn to the fieldÃ¢â ¬â„¢s beloved "Silver Bible" for a wealth of information related to the design and planning of residential and commercial interiors. But now, Time-Saver Standards for Interior Design and Space Planning, Second Edition goes even further to truly make the classic interior design reference the standard in its field. From standard furniture dimensions to architectural woodwork details, youÃ¢â ¬â„¢ll find a vast array of time-saving data and details. Editors Joseph DeChiara, Julius Panero, and Martin Zelnik have brought together contributions from well-known architectural and interior design firms to give you details derived from actual designs and working drawings, showing various solutions for typical design problems encountered in interior architecture. You get a wide range of typical layouts and residential spaces, offices, conference rooms, and reception areas, in addition to details of bars, restaurants, and public toilets. This exciting new edition includes new international examples and metrification Ã¢â ¬â œ and provides you with full coverage of healthcare spaces, educational spaces; home offices; videoconferencing spaces; green design; project forms and schedules. Two outstanding sections cover historic styles and woodworking. --This text refers to an alternate Hardcover edition.

Customer Reviews

Interior architectural details, planning standards, and reference data, for use by architects, interior designers, space planners, facility managers, builders, and design students. Long recognized as

one of the most comprehensive architectural and interior design reference resources and known as Ã¢â ¬Å“the silver bible,Ã¢â ¬Â• this new edition of Time-Saver Standards for Interior Design and Space Planning is an excellent source of easily accessible design criteria, planning standards, and technical guidelines. The vast array of design information, all contained in a single volume, facilitates and expedites the completion of programming, preliminary planning, design development, and working drawing services. This updated and revised edition of Time-Saver Standards for Interior Design and Space Planning serves as a primary source of information for all design professionals. Organized in an easily accessible format, the book contains key criteria useful to every design professional and builder involved in the planning of a large variety of interior projects. It includes, among other changes, entirely new sections dealing with healthcare spaces, hospitality spaces, banking spaces, conference centers, and accessible design, featuring the latest ADA design requirements. Moreover, many of the existing sections of the book have been significantly expanded to include such new material as design and planning criteria for video-conference spaces, as well as a host of additional lighting design details, workstation configurations, and reference standards. *Accessible Design *ADA *Architectural Woodwork *Audio-Visual Systems *Auditoriums *Banking Spaces *Bars & Restaurants *Bedrooms *Ceiling Types & Details *Classrooms *Closets *Coat Rooms *Conference Centers & Rooms *Construction Details/Interiors *Department Stores *Dining Rooms *Elevators *Fabrics & Furniture *Floor & Wall Coverings *Furniture Hardware *Healthcare Facilities *Home Offices *Hotel Rooms & Suites *Human Factors *Indoor Recreation *Institutional Interiors *Interior Architecture *Kitchens *Libraries *Lighting *Marble Finishes *Mathematical Tables & Formulas *Motels *Nurseries *Offices & Office Planning *Partition Types *Planning Standards *Primary Care Centers *Programming Standards *Ramps *Reference Standards *Residential Design *Restaurants *Retail Spaces *Revolving Doors *Shops *Signage & Graphics *Space Planning *Stairs & Ramps *Stores *Theaters *Universal Design *Wheelchair Lifts *Window Treatments *Wood Veneer Finishes --This text refers to an alternate Hardcover edition.

Joseph DeChiara (New York, NY) is a practicing architect and planner.Julius Panero (New York, NY) is an architect and interior designer and partner in the firm Panero Zelnik Associates.Martin Zelnik (New York, NY) is an architect and interior designer and partner in the firm Panero Zelnik Associates. --This text refers to an alternate Hardcover edition.

This book was one of the most helpful books I used while getting my interior design degree. It has codes, ADA standards, and history of furniture and architecture. It’s by far the biggest textbook I had

to use in college, but highly recommend it for anyone who is getting their design degree, even if it’s not required- it really is the only book you’ll return to time and time again.

great book for interior design. However, it kind of outdated for the working space!

Having a hand in designing your own office? Buy this book. Does is matter if you are in a metric country or use feet and inches? No, it does not. Want to know how high the desk should be? Want to know how big the office should be? Want to know how big to make the circulation areas? Given the price of the fit out, this book with save you a bucket of money, even if you are a lay person. There are lots of books that just give you the vibe. This book gives you the measurements.

A MUST have for all interior designers and interior architects! A big book of reference that has endless space examples and dimensions for every room possible (commercial and residential). If you don’t have this book, get it now!

This is a required book for anyone in Interior Design for a good reason: it has about everything, including the (many kinds) of kitchen sink. What I really can’t stand about using it is the seemingly arbitrary indexing, scattered locations for information and nearly impossible to decipher graphics on some pages. I do not agree that it has much useful information on furniture styles: you’d be better off to shell out for Aronson’s "Encyclopedia of Furniture" or Miller’s "Furniture" and get right to what you need. The standard dimensions are useful, though, especially for space planning purposes. Don’t be surprised if there is information missing in some cases, or it is outright incorrect. Be sure to cross-reference and here’s another tip: make a cheat sheet for yourself for the pages you use most, tape it to the inside cover and go from there. The Index is a goose-chase. Why three stars? Because I think they can do better. It is time for a rehaul of the Silver Monster.

Great book for interior design students but the picture quality is terrible and it is hard to read dimensions. I thought that buying the kindle version would make it more accessible since it is such a big book but I wish I had gotten the hardcopy instead.

This is the interior designer Bible. Don’t go to studio without it. This will help you plan and design everything imaginable. It is a huge book but well worth its price and weight. I highly recommend this book to any design student going into Architecture or Interior Design.

I bought this book in college because it was part of my required text for my degree in Interior design. I have been out of school for 4 years and I still keep it at my desk or nearby when I am doing drawings. I recommend this book to anyone who is in the design industry. The details and information in this book saves the designer from having to go through multiple books looking for specific details.
