Fundamental math concepts are conveyed through entertaining puzzles, tricks and word problems. For the numbers-averse, this book proves that numbers are only a part of math; for the math whiz, it offers plenty of challenges. Part of the learning-is-fun Brown Paper School series.

As a 6th grade math teacher I use the tips and tricks in this book for fun Friday activities. My students find these interesting and fun. Both my higher level learners and my struggling learners both enjoy the activities in this book.

An old college friend (who happens to be a math PhD) recommended this book for my wild-about-math 6yo, and he won’t put it down! He ADORES this book - I just wish it were a little sturdier, I’m not sure how much abuse it can take :)

I like the easy, conversational style of the book, which seems accessible without being dumbed-down.I think it is a great way to show children that maths can be fun, interesting and useful,

not just loads of dry facts and drill.I would recommend it to anyone of any age - even adults kick-starting their math career again - it provides a wonderful place to build from. This is not a workbook, or a drill book, it is an inspiring book.

This is so much fun for our family. We homeschool and Daddy and our eight year had started it. They are enjoying it so much our six year old has joined in.

This book was recommended by our math tutor who we hired to help our daughter learn to love math and not be so intimidated. The book is great, our rising 6th grader loved it and it's definitely helped to change her perspective on the subject. Highly recommended!

A great book, but it takes a commitment from both the student and an adult to get the most out it. Good help for students struggling in math or for younger students to learn applications of concepts. Even math-challenged adults could learn from it!

Thanks

(...) We have a copy of this book at home, and I've purchased this book to give to some of my children's friends and some home-schooling parents I know. I think giving this book to any math phobe, whatever their age, is a great idea. I also highly recommend the "I Hate Math Book", also by Marilyn Burns.
