Terrific little book

Being a gardener myself, I really enjoyed Karel Capceks observations of the gardener and the garden life. From page to page, it is like looking into a mirror. For someone less interested in the topic, there might be a little too many names of species, but his humor and philosophy should make up for it and give the reader some hours' joyful reading. His thoughts about spring beginning in the autumn brings sunshine and hope to me on a dark, cold and wet October day!

Lots of unfamiliar botanical terms. Still, a gardener should enjoy. A quick read, interesting drawings. Fine for distracted reading time

At age 85 thus book returned me back in my childhood, when I read it with my grandpa.
