Synopsis

According to Professor Gerald Schroeder, a nuclear physicist from MIT, GodÃ¢â ¬â„¢s creation took 15 billion years, but also six twenty-four hour days as Scripture states! The answer lies in time dilation in our universe. Things that look very small, like distant stars, are actually very large. And times that seem very short, like six days for all of creation, become very longÃ¢â ¬â •even as long as 15 billion years. Ã¢â ¬Å“How can these things be?Ã¢â ¬Â• Just read this book.

Customer Reviews

Yes! A great read on my Kindle when on the plane. I am also trying to read his more involved book about Genesis and Big Bang. I highly recommend this, though, because it’s more to the point and explained in layman’s terms (when someone gets too deep into physics, my brain spins like a wacked-out sister particle). I always knew God is the inventor of the Universe so Genesis and the truth that scientists are uncovering should not be at odds, and in fact, the opposite. I am sad when many scientists revile God’s hand in the Universe and many religious people revile scientists hand

in showing the most amazing facts to us (my mother devoted her life to helping eagles get off the endangered list, so I can't help but feel like a "child in the middle" during these damn stupid arguments of theology which are, in the end, moot and time-wasting). They bolster each other and are not at odds, unless pride and ego get in the way. Science can be a religion and religion can be "a science," but that don't save no one, no how.

I bought the printed version from Levitt. A good summary of Schroeder's book 'The Science of God' which I have also read. I have read almost all of Schroeder's books which are all worthwhile and being from a Hebrew scholar and nuclear physicist they provide a perspective not found elsewhere. Many videos are also on YouTube.

I need to know! I believe in God and the Bible, but my natural curiosity about science and the natural world seems to clash. Thanks to Gerald Schroeder I can now reconcile my intelligence with my faith. Billions of years old universe and six day creation explained! !

interesting

Everyone who struggles with the out dated, inaccurate science of Darwinian Evolution should read this book. True science and the Bible are not actually in conflict. It is only when bias, ignorance or corruption exist on either side that the conflict emerges.

WONDERFUL BOOK. WONDERFUL AUTHOR. SUPPLIES SOME REALLY GOOD POSSIBLE ANSWERS TO REALLY IMPORTANT QUESTIONS.

A good book for understanding how science and creation can both be in agreement.

Very interesting proposal, pretty well supported and written in language accessible to the lay public. Hopefully soon a translation into Spanish to reach people who do not read English
