## Customer Reviews

I wouldn't consider it necessarily 'complete' but we use it as a supplement to our homeschool just to make sure that we are still on track with the standards for the education system, should we ever decide to 'go back to school.' It's clear and concise, and does the trick for quick, but thorough, review lessons. It also has a test prep section which is nice for us, since our homeschool does not include any standardized testing material, the kids can at least familiarize themselves with the format.

This book is exactly what I was looking for to homeschool my son this year as I was clueless as this is our first! Huge book and lots to do for the year

My fourth grader is easily bored with all of the material so far, stating, "This is like pre-school!" (being sarcastic, it's not THAT bad!)Good review. It does seem a level behind fourth grade in our area. But, this is well laid out and a decent supplement to have extra worksheets as needed.

This will be our second year to use this curriculum and we LOVE it!!! It's an easy way to keep everything together and it covers everything my kids need.

I've been buying the complete curriculum since my first daughter started Kindergarden. I love them. I have three girls and to keep buying to keep them motivated. The activities, subjects, and test make this book of the best.

I've used these books for many years. Always plenty of information and very useful for homeschooling.

We love this book of complete curriculum, very easy to work with kids and going slowly from easy to hard studying. Definitely will buy more of them of different grades.

I have been buying these books from second grader on. They are very good.We use it as a complement to what my son learns in school.
