Customer Reviews

Book by Steinke, Greg A., Harder, Paul, Harder, Paul O.

I used this course a number of years ago while taking 1st and 2nd year theory in college. Because I had such a good experience with the course, I was surprised to see the low rating it received by the 1 reviewer shown. Undortunately, the rating goes to a provider of a used book rather than to the course. I highly recommend the course. As a matter of fact, after a number of years of being out of college and working in another field, I am now planning to go back to school and work on my doctorate. I got online, searching for this specific course as a review course for myself. When I originally used the course, I found it was excellent. As anyone with experience with academia knows, in large schools, the freshman and sophomore courses are often delegated to graduate students to teach. That was my experience with my first year. The teacher had no idea how to teach the material. Part 1 of this course explained all the same topics in a complete, methodical way that made self study easy. I had a very good teacher for 2nd year, but I still used the 2nd book. It was just so well organized and it provided a wonderful supplement to the class. I highly recommend this series. Do make sure you get the accompanying cd and use it.

The cover was bent, most pages had been written on, and the whole book was thoroughly worn. It was a complete ripoff even for the cheap price I bought it at. The actual material, however, is pretty useful after I erased or whited out all the written-in answers.
