Synopsis

The cool story of volcanoes will intrigue kids and adults alike. Hot melted rock from the middle of our planet forces its way up through cracks in the EarthÃ¢â ¬â„¢s crusts, exploding violently and sometimes unexpectedly in volcanic fury that can terrorize populations for months, even years. Anne SchreiberÃ¢â ¬â„¢s narrative gives readers a little of the science, a little of the history, and a lot of the action. National Geographic photography fires the imagination on dramatic spreads alive with vivid images of lava, ash, molten rock, weird rocks, and steaming seawater.

Book Information

Lexile Measure: 0710 (What's this?)

Paperback: 32 pages

Publisher: National Geographic Children's Books; English Language edition (July 8, 2008)

Language: English

ISBN-10: 1426302851

ISBN-13: 978-1426302855

Grade Level: Kindergarten - 3

Customer Reviews

ANNE SCHREIBER is a graduate in Science Education from Cornell University and began her career as an elementary school teacher. She wrote the science content for the Magic School Bus television series. She has written more than a dozen books for young children. She lives in Brooklyn, NY.

My 3.5 year old son has shown an interest in volcanoes (we live near Mt. At. Helens) and so I got this book for him. He loves looking at all the pictures and asked us to read it to him often. I'd definitely buy more of this series to help spark learning and engagement with my kids.

Among all the NG kids books we got (and we probably got them all) this one did not really capture my 6 1/2 and 4 1/2 sons' attention. I am not saying that the book is bad, but my kids are probably not interested in the subject... Nonetheless, the older kid read it to his brother (only once though, compared to the spiders and bats and snakes and lizards and so on and so on...)

My five (going on 6) year old grandson has been fascinated with volcanoes for several years now. He loves this book and spends hours looking at all of the pictures. He has a million questions each time. He can't really read yet on his own but this is one of his favorite books!

My almost 7 year old has been reading this to me. he was asking me questions about volcanoes so i picked this up for him. Money well spent.

Love the quality of pics! It's a great easy to read book for younger kids to learn about volcanoes. Plan on using this as an aid when we do our volcano science experiment.

just as expected

Love these books...so do my grandchildren!Well done and great pictures for children!

grandson loves these books
