Synopsis

I know not with what weapons World War III will be fought, but World War IV will be fought with sticks and stones. ~ Albert EinsteinAuthor Bobby Akart brings a poignant analysis of the threats our nation faces from a devastating Electromagnetic Pulse attack with:EMP: A threat from above to America's soft underbelly below. The clock is ticking.In poll after poll, one of the threats facing our nation is the use of an electromagnetic pulse weapon to cause a grid down scenario. There are many bad actors on the international stage capable of terrorism on a massive scale. The list is long, including Russia, China, North Korea, Iran, Syria and now even terrorist groups like ISIS. Each is capable of wreaking havoc in the US by shutting down our power grid and enjoying the resulting chaos.For fans of EMP books, EMP is a primer on the threats we face as a nation from the bad actors mentioned above. It explores the history of the electromagnetic pulse technology, and discusses its use for both military and non-military purposes.ABOUT THE PREPPING FOR TOMORROW SERIESFreedom Preppers came together in 2011 to share research with others on the subject of prepping. Originally designed as an informational website, FreedomPreppers.com quickly grew in prominence as its articles on preparedness were shared around the web. The goal of the Prepping for Tomorrow series is twofold. First, provide a detailed analysis of the threats we face as Americans. Second, give new and seasoned preppers alike the opportunity to enhance their preparedness plan with this knowledge.BOOKS IN THE SERIESCyber WarfareEconomic CollapseEMP: Electromagnetic Pulse

Customer Reviews

I venture to say that Bobby Akart's EMP is the most thoroughly researched and documented book on the subject of electromagnetic pulse in existence. EMP should be included in every government national security entity's reference library and used as a text for all military academies program of instruction on the subject. It explains in details and with historical reference what an EMP is, the various ways it is produced, it's affect on electrical devices, and how it could bring about an end to civilization as we know it. Marvelous piece of writing Mr. Akart!

This is well done, up to date, and the author covers all the issues of EMPs. The only thing missing is a better discussion of the sun and the earth as to catastrophic issues. But, he does deal with solar EMPs. There is also some good advice on preparedness without panic.

The book contains an explanation of what an electromagnetic pulse is; How it can be used as a weapon; How wide surprising and wild spread its effects are.It also explains:1. Where we stand with other nations.2. Aftermath of an attack.3. Shielding.4. Preparation for an attack.

While there are a lot of books out there about what could happen if we as a country were to experience an EMP, Bobby Akart's book goes deeper and teaches us not only what might happen, but how best to prepare ourselves to endure such an event. All of Mr Akart's books in the Prepping for Tomorrow series are like this...they teach necessary information in such a way that it is a good read that will stick with you and be remembered.

Yet another great offering from Bobby Akart. Not part of his fictional novels, this is a very informative book chocked full of facts about EMP. Very well researched. It gets me motivated to prep for power when the SHTF! Great job Bobby!

I like Akart's writing style anyway, but this book is a great companion/reference book on the subject of EMP and goes along with the fictional "Boston Brahman" series he's written. Easy to understand and follow, it also has some valuable reference materials in it. Definitely recommend.

Good story which ended too soon. I just wonder why these people are never able to get around on bikes, roller blades, skate boards, scooters, or horses. Its always old cars. I'd like to see more imagination to get five stars.

If you want the ready skinny on how its going down by EMP and want to prepare this is the book. This book will grip you from start to finish.
