Customer Reviews

John Fitzgerald Medina is a schoolteacher with a background in high-tech engineering. He holds degrees in mechanical engineering and education. He and his wife, Nancy, live in San Diego with their son, Joaquin.

Stimulating review of pioneers in the transition from Cartesian-Newtonian science to a view of the world and humankind from a transpersonal, spiritual perspective. Thoughtful analysis of the limitations of new age humanistic approaches in relation to an approach that posits the existence of a Divine Presence that communicates to humankind through a special representative often known as a Prophet who manifests the Essence of the Unspeakable or Unknowable Creator. The author helps the reader to understand how the principles of science can be applied to the study of spirituality and offers convincing arguments to support the idea that mankind is need of a spiritual authority to inspire and direct the emergence of a just and peaceful society.

Mr. Medina has done a masterful job of giving us an overview of both the reasons for the current disintergration of (western, in particular) society & the simultaneous emergence of a completely new

worldview/culture. Creative destruction indeed!I would like to thank Mr Medina for giving me, a third generation descendant of British colonisers in the Antipodes, a whole new insight into the effects of colonisation on indigenous populations & for enabling me to take a closer look at the subleties of my own, perhaps inherited, or otherwise learned attitudes towards different cultural perspectives.This book, I sincerely believe, has aided me in my journey to becomming a better world citizen & conscious participant in the building of Baha'u'llah's new world order.

This ranks as one of the most illuminating and absorbing books I've ever read. It presents the alignment of the Baha'i Faith teaching with quantum physics and holism in a way that must dispel any doubt about its authenticity, importance and impact on the future of our planet. It's an amazing book that I recommend to any person searching for an alternative paradigm to the present day application of the mechanistic, materialistic and deficient (Cartesian Newtonian) Western perception of physical reality and its current pervasive and destructive impact on the planet.

Phenomenal!

Covering a faith pertinent for today's unique challenges, quantum physics, and a holistic view of psychology the book is a MUST to read. I enjoyed looking at the unfolding history of the holistic movement and the terminologies gave me a framework to express my spiritual pathway so that others might understand my journey. I found it uplifting to find other groups of thinkers who were also wanting to express the virtues in service and to form institutions that could more readily deliver compassion and justice free from prejudices.

This book is great and I'm really enjoying it. It's very informative and provides a great perspective on modern history and the new discoveries of our time. I would highly recommended it to anyone interested.

I am having trouble finishing the book. There are some problems with some of the assertions and backing them up.

This is a wonderful, thought-provoking, inspiring book! I highly recommend it.
