Synopsis

The Keystone State claims Eastern Hemlock as its state tree, one of thousands of species of plants growing in the diverse ecosystems found throughout the state. This beautifully illustrated guide highlights over 140 familiar and unique species of trees, shrubs and wildflowers and also includes an ecoregion map featuring prominent botanical sanctuaries. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in the USA.

Customer Reviews

Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, KavanaghÃ¢â ¬â„¢s path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children’s book on evolution.

Lots of trees and flowers are ID’d but it has only leaves, no bark info. Also, there is a color-coded

map that does not correspond to any of the guide items. It is laminated and folds accordion style. Would not buy again.

Because I didn't read the copy correctly, I expected a book. It turned out to be a small pamphlet but a very well witten pamphlet and I love the ease of handling it. It's one of my favorite tree identifiers.

Nice booklet - easy to carry around.

Love it!

nice, simple text and graphics, sturdy, laminated, I like.

Very helpful

Card Board Fold Out, OVER PRICED! Not worth the price and shipping. Do not waste your money for this item!

My wife and I have a large lot and enjoy the many of God's creations it contains.
