## Synopsis

From diagnosing diseases to navigating spacecraft, from challenging us in video games to selling us products on the Internet, artificial intelligence (AI) now affects every aspect of our lives. Over the last fifty years, researchers have created AI systems that are startlingly close to human intelligence in their capabilities, and progress continues to accelerate. This wide-ranging book looks at the origins and applications of AI - in robotics, science, industry, war and entertainment - and explores the exciting implications, and underlying risks, of future AI developments. It includes fact boxes, 'debate' suggestions to stimulate discussion and 'viewpoints' to show people's conflicting views on the subject. --This text refers to an out of print or unavailable edition of this title.

## Book Information

Series: 21st Century Debates

Library Binding: 64 pages

Publisher: Raintree (April 2003)

Language: English

ISBN-10: 0739855042

ISBN-13: 978-0739855041

Product Dimensions: 9.7 x 6.6 x 0.4 inches

Shipping Weight: 11.8 ounces

## Customer Reviews

The author Alex Woolf is an experienced writer and editor of children's information books, specializing in history and science at secondary level. The consultant, Professor Igor Aleksander, has researched artificial intelligence since 1965. His recent work at Imperial College, London, has been on artificial visual awareness and models of the brain. He has written over 200 papers in these fields and twelve books, including How to Build a Mind (Weidenfeld & Nicolson, 2000). He was awarded the Institution of Electrical Engineering's Year 2000 Outstanding Achievement Medal for contributions to informatics. --This text refers to an out of print or unavailable edition of this title.
