Customer Reviews

Text: English, French, German

Founded in 1977 in Munich, Nelles Verlag publishes folded road and travel maps in color. Nelles uses special, easy-to-fold paper that allows thousands of refoldings without fraying. Nelles maps are highly readable, detailed relief maps with major roads and point-to-point distances clearly indicated. The maps include highly useful legends; city maps show tourist features such as hotels.

Travel essentialshave nothing else to compare it with, so difficult to make a reasonable judgement, but it is in good shape.

I am returning this item because:-Proper names are not spelled in standard English forms (the publisher of this map is in Germany)-It is difficult to read the map - it is a topographic map, which is unnecessary and makes it difficult to find and read the cities, notes etc. printed in red.Even if one is familiar with the region it is difficult to find things on this map!

A great overview of the regionI like this map because the colors are subtle and the shading shows how very mountainous the region actually is. It helps to understand how the political boundaries came to exist. I also like that the parks, museums, and other things to see are marked directly on the map, so I don't have to hunt for anything in an index.

I used this when I took a tour along the ancient Silk Road. It showed all the spots we visited in Uzbekistan and Krybyzstan.
