These photographs will take your breath away. The landscapes are incredibly beautiful, and the

quality of the images is of the highest caliber. Ya gotta love this planet...

This is good for people who love photos book, but for me is not that good. This book has nice cover but the printing quality is poor and also the quality of the photos in this book are not meet the photographers name's. The contents is not very interesting, actuary its just like a book with photos, name of that place with some description. This is not for people who looking for a stunning photo or lean something.

The photographs are so gorgious and real that they make you feel like you are right there. From the cliffs to the sandy beaches and from the light houses to the huge watery rocks make this book extremely unforgettable.
