Customer Reviews

Merrill Geometry Applications and Connections for Middle school and High School.

I’m a retired engineer, and I tutor several kids in the Denver area (Math). One on my students attends a very highly ranked (in Math) private school here in the Denver area. This is the book the school selected, for 10th grade Geometry. So, of course, I had to check it out myself. It’s very thorough. I have seen one (Geometry book) that I liked a little more (years ago)...but I cannot remember the author or title. This book does a very good job however!

I used this book to teach geometry to high school students for ten years. The problem sets are excellent and help students to develop logical/deductive reasoning. I bought two copies of this book--one for private tutoring and one for my own children to use.

Exactly the book I needed. Perfect brand new condition. A lot cheaper than a used book would have been at my school, and I got it new!

The book is just as described. Seller was quick to ship! Would definitely do business with this seller

again!

the best product, high quality and low price . a gift to my brother , delivery on time receive it next day . tell a lot of the product . This is the first "larger product" in our kitchen collection. Thus far (one week), it is sharp, performs well for chopping and slicing, and has excellent balance and weight. Time will tell how it retains its edge and resharpens.

Book was exactly as expected and arrived quickly. The book was required for one of my daughter’s science classes.

Fast service and the book is in excellent condition for a very a good price.

It was a bit "beat up" but for the price - it was great!
