Founded in 1977 in Munich, Nelles Verlag publishes folded road and travel maps in color. Nelles uses special, easy-to-fold paper that allows thousands of refoldings without fraying. Nelles maps are highly readable, detailed relief maps with major roads and point-to-point distances clearly indicated. The maps include highly useful legends; city maps show tourist features such as hotels.

I used this map for a cycling trip that ended up taking me from the southern tip of Sumatra to Jambi. I found the map good for planning as it does help one figure out the kilometers between places. The problem with the map however was that the smaller cities that I went through had different names than that on the map. For example te city of Musi was not even listed on the map yet it was larger than cities that are listed. It could have been listed as a different name, but this was the same issue with all the smaller cities.
