Synopsis

Finite Mathematics with Applications in the Management, Natural, and Social Sciences presents sound mathematics in an understandable manner, proceeding from the familiar to new material and from concrete examples to general rules and formulas. The Eleventh Edition retains its focus on real-world problem solving, but has been refreshed with revised and added content, updated and new applications, fine-tuned and newly-integrated pedagogical devices, and enhanced exercise sets. Ã Â Note:Ã Â You are purchasing a standalone product; MyMathLab does not come packaged with this content. MyMathLab is not a self-paced technology and should only be purchased when required by an instructor. If you would like to purchaseÃ Â bothÃ Â the physical text and MyMathLab, search for: 0321946111 / 9780321946119 Finite Mathematics with Applications In the Management, Natural, and Social Sciences Plus NEW MyMathLab with Pearson eText -- Access Card Package Package consists of 0321431308 / 9780321431301 MyMathLab -- Glue-in Access Card 0321654064 / 9780321654069 MyMathLab Inside Star Sticker 0321931068 / 9780321931061 Finite Mathematics with Applications In the Management, Natural, and Social Sciences Ã Â

Book Information

Hardcover: 648 pages

Publisher: Pearson; 11 edition (January 3, 2014)

Language: English

ISBN-10: 0321931068

ISBN-13: 978-0321931061

Product Dimensions: 8.5 x 1.1 x 11 inches

Shipping Weight: 3 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 18 customer reviews

Best Sellers Rank: #17,623 in Books (See Top 100 in Books) #5 inÃ Â Books > Science & Math > Mathematics > Pure Mathematics > Finite Mathematics #310 inÃ Â Books > Textbooks > Science & Mathematics > Mathematics

Customer Reviews

Marge Lial (late) was always interested in math; it was her favorite subject in the first grade! Marge's intense desire to educate both her students and herself has inspired the writing of numerous best-selling textbooks. Marge, who received bachelor's and master's degrees from California State University at Sacramento, was affiliated with American River College. An avid

reader and traveler, her travel experiences often find their way into her books as applications, exercise sets, and feature sets. Her interest in archeology lead to trips to various digs and ruin sites, producing some fascinating problems for her textbooks involving such topics as the building of Mayan pyramids and the acoustics of ancient ball courts in the Yucatan. Ã Â Thomas W. Hungerford received his bachelorÃ¢â ¬â„¢s degree from Holy Cross and his Ph.D. from the University of Chicago. He taught for many years at the University of Washington (Seattle) before moving to Cleveland State University in 1980. He has been at St. Louis University since 2003. He has written a number of research articles in algebra and several in mathematics education. Dr. Hungerford is the author or coauthor of more than a dozen mathematics textbooks, ranging from high school to graduate level, several of which are published by Addison-Wesley. He is active in promoting the effective use of technology in mathematics instruction. Dr. Hungerford has also been a referee and reviewer for various mathematical journals and has served on National Science Foundation panels for selecting grant recipients. Ã Â John P. Holcomb, Jr.Ã Â received his bachelor's degree from St. Bonaventure University and his Ph.D. from the University at Albany, State University of New York. He is professor and chair and frequently publishes with researchers in a variety of disciplines where heÃ Â provides statistical analysis. Dr. Holcomb has also authored several papers in statistical education and is very active in theÃ Â American Statistical Association and the Mathematical Association of America. He was named a Carnegie Scholar in 2000 by the Carnegie Foundation for the Advancement of Teaching and Learning and in 2003 received the Waller Award from the American Statistical Association for outstanding teaching of introductory statistics.Ã Â Ã Â Bernadette MullinsÃ Â received her bachelorÃ¢â ¬â„¢s degree from Western Illinois University and her Ph.D. from the University of Iowa. She is currently professor of mathematics at Birmingham-Southern College in Birmingham, Alabama, where she arrived in 2000. She has published numerous articles in the fields of commutative ring theory and mathematics education. She has served as co-investigator forÃ Â several National Science Foundation grants related to improving mathematics education. Dr. Mullins has won four awards for her excellence in teaching, including theÃ Â Bob WhetstoneÃ Â award at BSC. Throughout her career, she has been active in Project NExT (New Experiences in Teaching) and the Mathematical Association of America, and was elected Alabama State Director of the MAA in 2013.

From what I have used of it so far, it is a good math book. My two problems I have with the book are that it 1: doesn’t give enough examples of some of the concepts before expecting you to be able to understand them and work out the related problems, and 2: in the appendix, it only lists the

solutions to the odd numbered questions. Otherwise, it works very well in addition to my professor's lectures (although without my professor's explanations, I wouldn't be able to understand quite a few of the concepts in the book).

Nice book

Used in school.

the book was ok, the teacher sucked!

Excellent, thank you. Comprehensive and Detailed.

Perfect shipping and was the textbook that I needed for class. It was hardback which was a plus. Not much else to say other than everything went smoothly.

Great book for the finite math class. Also loving to have the prime advantage on the rental.

Was basically brand new condition. Only thing that showed it had been used before were the stars someone had put on certain sections of the book.
