Great!

I ordered this book for my son, it was an excellent buy.The textbook at his college was 3 times as much as i paid for this one. The book was in excellent condition and came back before his next class meeting.Thanks to all involved!!!

this book in my College's bookstore was 197 dollars. i had a freind tell me about  and i saved close to 150 dollars. the book is used but it is practically brand new. this is a really great book. some of my past machine shop books for class had a couple of errors in it that my class fixed. but so far, this one has been the best. it is full of details, pictures, and tricks to doing things.i highly reccomend this book to anyone planning to read up on die making.Chance,(Graduating Central Carolina Tech May 2011)

David Eugene Ostergaard is my father, and the author of this and Advanced Diemaking. McGraw-Hill has never recognized him or his family in any way. While he should have received, and should still be receiving a percentage of all sales of his books, no monies or other recognition have ever been offered. As these books are still being used at colleges nationwide, I feel it is important for buyers to know this. Thank you everyone who appreciates his work. should you care to offer input, i can be found on Face Book as Laurie Ostergaard-Overbey.

Wish they would revise this book. I did my apprenticeship 50 years ago and used the same book! Evan being very dated the basics of diemaking have not changed, book is good for that. But it needs CAD, CAM and CNC.
