Age Range: 12 and up

Grade Level: 7 and up

Customer Reviews

"This reference is an inviting introduction to using maps for the young student."Ã¢â ¬â •Adrienne Antink of American Reference Books Annual

National Geographic is a recognized authority in mapping excellence. For 120 years the Society's maps have helped spread geographic knowledge to people around the world. A multi-million-dollar database allows National Geographic to combine the latest data gained by space-age technology with innovative digital mapping techniques to create state-of-the-art political, physical, and thematic maps. Meticulous research and attention to detail have established a standard of achievement that

is second to none.

This a great little tool for any student or wanderer or person just interested in knowing something of the world. It isn't the most comprehensive atlas, but it's not designed to be. It's easily transportable in a briefcase or some such. I use it with an overhead projector in my world politics class. I really have no complaints. Thus far, it fits the needs for which it was purchased.

Not what I expected. Not a good collection of maps

The student atlas gives a very brief overview of each of the continents- if you are looking for info on a specific country this isn't the atlas to use. It does have interesting and various styles maps, though.

I love the fact that individual, beautiful, colorful maps of countries and continents, are on one single page, making map copying for my students easier to master. However, there are some features left off of these maps that can be found in other atlases, such as the Rand McNally, I use both, the Nat Geo for copying and scale, and the Rand McNally for features I am unable to locate.

We needed this to keep up with the places our government seems to be getting involved with more and more. Ugh! Thought I knew the world. Wrong..

The only problem is that it doesnt seperate Australia. I'm in middle school, so this atlas is more for 6th or elementary school.

this book is PHENOMENAL! I teach third grade, the kids all want to read this book all the time. My children from families abroad, domestic, wherever! it is a great teaching tool for non-fiction and text features, as well as a vocabulary builder. the colors and comprehensive content make it really interesting to leaf through as well.

Great for home school!
