Synopsis

HOW TO MAKE MONEY ONLINE: Learn how to make money from home with my step-by-step plan to build a $5,000 per month passive income website portfolio (based on building 10 websites that make at least $500 per month each). In association with makemoneyfromhomelionsclub.com NO PRIOR EXPERIENCE REQUIRED. ALL INSTRUCTIONS ARE FULLY DETAILED AND STEP-BY-STEP SO ANYONE CAN FOLLOW THEM EASILY. Online passive income is the ultimate dream. Making money while you sleep. Everybody wants it. But is it really possible? The short answer is "yes." The longer answer is "yes, but it isn't easy to accomplish." If it was, wouldn't everyone be doing it? In my ebook, I give you a step-by-step plan on how to develop a passive income website portfolio and show you how making money online actually works (with links to supporting video lessons for extra clarity). The specific plan I teach is designed to make you $5,000 per month in passive income earnings, based on 10 websites, with each website having a targeted earnings level of at least $500 each. Once you understand the process though, you can decide to build 20 of these websites, or 100! When you stop is up to you (and yes, there are people making tens of thousands of dollars per month on the Internet based on these concepts - they just love the work and don't ever stop building new websites or expanding their current ones!). What's great about the business plan that I teach you is not only the income level you will accomplish if you follow through, but all that you will learn in the process. The skills you learn in this ebook will enable you to build all kinds of online businesses and open the door for all kinds of entrepreneurial projects you may have. Not only that, you will be able to evaluate business ideas much more intelligently once you've gone through this whole process. You will understand the fundamentals of keyword research & analysis, traffic & lead generation, social & affiliate marketing, monetization & conversion testing, and traffic analysis. These skills will help you immensely in ANY business you ever decide to start (online or not, passive or not). Generating an online passive income won't happen overnight and takes a lot of hard work, but going through the process is completely worth it and having an exact plan of action is the ONLY way to ensure success. Let me put it this way: if you were offered no pay for six months for 40+ hours of work per week, but after those six months, you got $5,000+ per month for the rest of your life, would that be worth it to you? If that idea isn't unbelievably exciting to you, then this isn't the business for you. This isn't a get rich quick scheme. This is a business. Except with this business, instead of trading your time for money (like most jobs), you are investing your time. You work hard now and continue to reap the benefits indefinitely. Building an online business takes a lot of work and a lot of patience, but the rewards can be amazing. That's the kind of business that I teach you in this ebook.

Promoting things on Google is no longer done the way this book describes as of March 2014 when I read it. Don’t waste your money, as that’s a large part of the book.

The title of the book is somewhat misleading. It sounds way more sensational than what the book offers - this is a guide on setting up your business websites and blogs, making sure those sites rank

high enough in search engines to be visible, and then monetizing them. How much profit you can make from those sites is up to you.The SEO tricks here are "White Hat", mostly. This is good because if you don’t know what you are doing yet (and sometimes even if you do), "Black Hat" SEO will get you in trouble with search engines.The process is pretty straightforward, from keyword research to backlink building and monetizing. Nice bits like legal info is also included, which is a plus - most similar guides don’t really go into the trouble. There’s a whole lot of stuff here you can just copy and paste that should make setting your sites way easier.However, I think that while the book has a walk-through for pretty much anything you need to set up your business sites, it would have benefited from real life examples. This would have made it easier for those of us who are still learning the process. The videos from the Resources section of the website the book has links to do help somewhat with that though.I’ve read several similar guides recently and so far this one gets points for being very thorough. I would have preferred some of the info from the site to be included in the book so I don’t have to go back and forth all the time. It’s just my quirk - I like my information in one place. That said, the site does have a lot of resources.Props to the author for statements like - "the "get rich in 30 days online" Internet courses never work... they don’t last long in Google." True, one has to put up some time and effort and be pretty careful while at it. I am still learning but I’ve already realized that.My Conclusion: This a solid, no-nonsense guide for setting up business sites with nice walk-throughs.

After reading this book, and talking to a couple of programmers, I get the idea that its just a way to try use shortcuts as opposed to really learn what you are doing. One friend, a former programmer who now does freelance, said most of the messes she straightens out for people come from people who try to do their own work without actually having to learn coding. That is what this manual encourages you to do

This book i got in 2013 i think i read it and was put off by the ads and sales pitch .And the methods maybe in 2013 you could make money with adsense ,now in 2017 you need like thousands of visitors to make money on adsense, i made like 2 dollars on adsense had over 80,000 views still waiting for my check but thats a whole nother story.But heres the thing while this book is outdated just use the seo info ,and the keyword info in it and monetize your blog or website with whatever you want dont use clickbank and only adsense use the book just for that. And dont click on his links go to his website or anything.

I read this Kindle e-book about three times before getting started and have found it very comprehensive and easy to read. Mike takes you step by step through how to set up a website, how to search for keywords, how to monetize the site using Google Adwords and associates (others are explained/suggested too). It's a no-nonsense and easy to follow guide; all that it requires is careful adherence to his process, and diligence.By far the most helpful part of the process is the keyword research. I've done SEO work before and have had a very causal approach to keywords ("what would the customer be searching for?"). However, he shows you how long-tail keywords are more effective and easier to rank highly for. Invaluable.My only word of warning, which is by far NOT a criticism, is that the programs he focuses on for monetization (Google Adwords and Associates) are not appropriate for content with sites that have sexual content, as these programs do not allow you to use them on such sites. As I am a sex therapist by profession, it's a little frustrating (both those programs consider even therapeutic advice or any mention of sexual functioning and pleasure inappropriate and they will not allow their ads on your site, which is of course odd as I can advertise my services /products with both of them!). So Clickbank affiliate products are much better as they have plenty of sex-related products, and ads through friends (click cash) also offer sex-friendly pay-per-click programs.If you've enjoyed the book, it's worth watching Mike's Udemy course (free) on the same topic as he takes you through it visually, too!

Kind of sleazy. If all you want to do is make a blog that makes money there's some good info in here, but if you're more interested in have good, quality, helpful content for your blog, pass on this book. It would be good for a used car salesman....

I didn't give it 1 star because there is a lot of good information in the book...but it's just that, good. Not great. Also, you really have to dig to find the good information, and by dig I mean sift through all the ads, promotions, fluff, etc.For example, very beginning, the author lists freelancing as a way to make money. That is true, but, it is very tough to make as much money as the author claims. Also, you could just google "how to make money online" and freelancing comes up. Is it worth buying a book for? No. Is it true? Yes.But then back to almost every single page has a link which is really just an ad to a site that wants you to join.If you took out all the links, maybe had 1 link in the beginning or end MAX, I would have no problem giving this at least 3 stars. Maybe even 4!Also, the author does do a very good job with explaining how/why businesses use google to increase their sales, and how you (the reader) could make money off of that. It is much easier said than done, and the author doesn't give any tips or secrets on how to actually make money, rather just explains the

system which is out there without how to break into it.
