Synopsis

The teddy bears are backÃ¢â ¬â •this time to teach readers all about patterns. Similar to the first three books in the McGrath Math series of concept books, TEDDY BEAR PATTERNS uses rhyming verse to explain the concepts illustrated by the colorful teddies. This simple text helps children to follow along as the teddy bears sort by color, and arrange into patterns of two colors, three colors, and so on. Readers will also discover how they can use patterns to skip count, add, and even multiply, before trying their hand at creating a pattern of their own.TEDDY BEAR PATTERNS is a worthwhile addition to the classroom, especially those that already use bear counters or other manipulatives as learning tools. Back matter provides a summary of the concepts introduced in the book.

Book Information

Lexile Measure: 300L (What's this?)
Series: McGrath Math
Paperback: 32 pages
Publisher: Charlesbridge (February 1, 2013)
Language: English
ISBN-10: 1580894232

Customer Reviews

Barbara Barbieri McGrath was a nursery school teacher before she dedicated herself to writing children's books full time. She is the author of THE LITTLE RED ELF, THE LITTLE GREEN WITCH, and many bestselling math concept books. Barbara lives in Natick, Massachussetts.

Great Book and collection

Bought this to add to our hands on math curriculum for my young kids. Love these hands on lessons with our homeschool.

Wonderful way to begin teaching young children to be observant and to sort objects by characteristics, and find patterns. These are the basis for problem solving and an important foundation for thinking skills. A perfect book for use by parents at home during family time.

Great for color sorting, learning colors and beginning patterns. My little girl loves it! She is three and had a lot of fun with the bears I bought with the book.

This book is very cute! I bought it for my daughters 4th birthday and she loves it! I bought the bears as well and she loves to use them with the book.

Fun and educational book!

So we bought the 50 bear assortment with 5 colors and 5 coordinating color cups, but in that assortment there is no orange. We have the Teddy Bear counting book that utilizes the 50 pack of bears and didn't realize there were different sets for different books, It would be really nice if there was a description of which set will be required for each book. We have a really bummed out 4 yr old who can't do the patterns in this book because we don't have any orange bears.So now we need to buy another set just for the orange bears. Seems like quite a marketing scam to me. Lame.

We checked this book out from the library this morning and I purchased it a fee minutes ago! I absolutely love seeing my children (ages 3, 4 and 5) interested in math! I know a lot of people who hate math, so I hope that I can use this book as a tool to get then interested in it early!
