Synopsis

In this, the final volume in her Handwriting series, Blatt analyzes the handwriting of various letter-writers to identify the positive and negative traits that tend to help or hamper one in achieving his or her career goals. For some, their handwriting may indicate a need to change careers; for others, to forge ahead in their current professions. Some know what career they want but may fail due to emotional problems, while others wrestle with the conflict between financial security and pursuing their passions, or struggle to balance career and family. Included near the end is a chapter on personnel selection, with tips for both employers and employees, as well as a brief study of the handwriting of well-known personalities and what it says about their career choices.
