Customer Reviews

I teach basic weather to high school freshmen and have found this book to be at the right level for teaching a basic understanding of weather.

I purchased this textbook as a replacement for the one my 8th grade son lost. The school threatened to charge $27 for it. Luckily I found it on for $4. I was quite surprised when the used book arrived. My expectations were set so low. From the moment I removed the book from the box, couldn’t believe it. It was perfect. I was unable to find any markings. It had the new book smell and it opened like a new book. Oh, and the price was fabulous too.

convenient, flexible, sturdy unique and awesome I received the goods in accordance with what was presented on the site. Recommend!Amazing product for the price and how well it works works well and will probably continue to do so Great product. It’s everything I wanted I am very pleased with my purchase.

good

Perfect book! Fast shipping!

Very good

This book was advertised as used but the quality was brand new! Very happy with my choice.
