## Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of the National Geographic Society, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking.Today, National Geographic Maps continues this mission by creating the

world’s best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world. All proceeds from the sale of National Geographic maps go to support the Society’s non-profit mission to increase global understanding and promote conservation of our planet through exploration, research, and education.

The number 1 item on my friend’s bucket list is to climb to Mt. Everest base camp. When he told me his dream, I decided to help him out by getting him prepared for the exciting journey. I purchased the National Geographic adventure travel map along with the book Trekking in the Everest Region after reading the highly satisfied ratings both books were given. I am wrapping the set up and giving it to him for Christmas, I can’t wait to see his face.

You can definitely buy cheaper maps in the Khumbu, but they are printed on cheap, easily tearable paper. I used this map over and over. Outside of the actual Everest base camp location (there’s a difference between the Trekker’s Base camp and the Climber’s Base camp) and the contours of the Khumbu glacier (I doubt anyone would have this) - I referred to this map every day of my trip. Buy a couple of cheaper maps for reference - but this is the map to use.

Great details - plus includes map of Kathmandu. But, will be six months before I get a chance to compare the map with the territory.

The map is brilliant for anyone travelling to Everest. It shows you all the the area around including entrance, altitude, treks etc. plus it brings a bit of valuable general information and the it is clear and easy to take in anywhere. Very easy to read when you are tired at 6000 meters above sea level and if your tough enough hopefully above 8000 meters above sea level as well.

I took this map trekking in this region, and many other people who saw it asked me where I got it. That should say it all. This map is really very, very good, and better than any others that I saw there. If you are going into this area, you cannot do better than this map.

Absolutely great map.

I purchased this map so that I can tell where the lakes and streams reside while trekking in the Everest region. Overall it was pretty useful and a solid tool to have along with me, but I do wish it

had a bit more detail on the water formations.

Happy with purchase.
