Synopsis

Backyard Beekeeping Business Strat Up How to Start, Run & Grow a Million Dollar Organic Honey Business From Home!I first got exposed to the idea of beekeeping back in 2005 by my next door neighbors. They were doing it right in their backyard, and according to them, they were making a decent side income from it. As our third child was on the way, I was trying to figure out a way to make some extra income and yes I dove right into this business without knowing anything about bees.But I knew if I set my mind up to do something I would do it till the end. Little did I know that this would literally change my whole life for many years to come.Long story short, I started out from my backyard, and in two years, after creating a successful partnership with my neighbor, we opened up a bee farm and had a huge success. The business grew every year by 15%-20% from the previous year. Last year we suddenly had an unexpected offer from a big name honey producing company to sell our farm. After a month long debate and discussion between family and partners, we started the negotiation process, and I am happy to report that we were able to sell our farm for a good profit. This book is not about my success but yours, I want you to read this book with an open mind and think about the possibility of having your own beekeeping business.This book is the direct result of those 11 yearsÃ¢â ¬â„¢ experience in beekeeping and bee farming. I may not be the ultimate authority in this field but what I share in this book is what I learned over those 11 years. This is pure and honest knowledge, maybe a bit raw at times.I have learned a lot not only about the bees but about Honey and what good they can do for our body and overall well-being. Customer Reviews

After reading this book, I am convinced that it is not as hard as I thought initially to start a beehive. I think like the author described with proper gear and a startup hive, I think I can get started with a tight budget. As I don’t want to spend a lot at first, I want to see how the first season goes. I am motivated enough to give this a try.As for the business aspect of the book, I see the author’s point, I think it is for people that are looking to make some extra money, that is not for me as I am busy with my full time job and I am happy with what I do now. Overall a great book with plenty of solid

information

I am always up for trying something new that doesn't cost much and I can make a few bucks. ÃƒÂ¢Ã â ¬Ã â But more importantly I love honey, as it is actually one of the healthiest foods you can eat, but not just any honey - honey that is made by bees in your local area is by far the best. That's why I have been looking into keeping my own bees and the reason for reading this book.After seeing the title of the book, I had that light bulb moment and realized, YES! I can have both, enjoy the pure local honey and make a little money on the side. Maybe not a full blown farm like the author suggested but just sell what I can produce from my backyard. I definitely will give this a try. A great book no doubt, easy to read and understand.

If you're looking for a bookingkeeping business, then you need to add this book to your archive because it content is exceptionally great.
