Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking.Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

A strong quality map that has details of everything you'd want when travelling by road, or just figuring out where an airfield or train station are. Maybe not as good as a US type road atlas, but this will give a darn good idea of what's around and how to get there. With this particular map, Tanzania is the main focal point, with Rwanda and Burundi being little brothers. But, it still gives a good idea of both these other countries, and considering it's very hard to find a good map that has them on it in any detail, I'd highly recommend getting this. It's a map that will stay true for years to come.

We took the map on our visit to Tanzania and Kenya last fall. If you are visiting the Masa Mara and the Serengeti, the map is a good source and information about where you are going on your trip.

I travel all over the world and never go without one of these maps since they are durable and provide details not necessarily found in a travel book.

Could not find GPS maps for the countries. This was surprisingly helpful for finding our way around. Did not have many of the unpaved roads in the national parks, but only licensed guides were allowed to drive there anyway. Found it really useful, especially when driving in Rwanda.

great map

Great and as described . Fast shipping too. AAA+++

I bought the maps for my wife's planned safari next year. I love the sturdiness of the maps. We have

used similar maps when exploring the western US by 4 Wheel Drive. They can survive a lot of abuse.
