Book is amazing! The best book for step 2 cs preparation. It is the best for IMG. Has all necessary phrases used in physical exam part as well as description of how and what to do during physical exam. Has a bunch of kaplans mnemonics for history taking, explanations, empathetic statemwnts. Information what checklist uses sp to grade you (this is crucial for CIS part). And the patient notes are simply outstanding and focused to the case. Differentials are well supported (i finally realized what usmle wonts from me), diagnostic studies in the notes a very focused and pertinent for the differential diagnosis. Pt notes written in bullet format, using a lot of abbreviations (this is absolutely necessary, because time is very limited in the exam). The book is simply the best! Thank you Mariana Cuceu and everybody who contributed for this book!
