Synopsis

Prepare yourself: How things are made is changing. The digital and physical are uniting, from innovative methods to sense and understand our world to machines that learn and design in ways no human ever could; from 3D printing to materials with properties that literally stretch possibility; from objects that evolve to systems that police themselves. The results will radically change our worldâ •and ourselves.The Future of Making illustrates these transformations, showcasing stories and images of people and ideas at the forefront of this radical wave of innovation. Designers, architects, builders, thought leadersâ •creators of all kindsâ •have contributed to this look at the materials, connections, and inventions that will define tomorrow. But this book doesn't just catalog the future; it lays down guidelines to follow, new rules for how things are created, that make it the ultimate handbook for anyone who wants to embrace the true future of making.

Customer Reviews

Tom Wujec is a Fellow at Autodesk, where he charts long-term strategy and helps leadership teamsÂ tackle tough industry challenges. HeÂ has brought several award-winning products to market, including SketchBook Pro andÂ Maya. As a recognized global thought-leader, Tom studiesÂ collaborative creativity, wicked problem-solving and the impact of emerging technologies onÂ how we design and make things.

This explains in an informative and fascinating way, what we make, how we make, and who does

the making, are changing.

A well-designed, beautifully-illustrated manual; provides a useful and time-relevant snapshot on the present and future state of 'making'. Great for starting a conversation on the social and environmental impact of technological advancement.
