Synopsis

50 Exquisitely Detailed Mandala Images There are many Mandala coloring books on the market but none can compare to Ã¢â ¬Å“The World's Best Mandala Coloring BookÃ¢â ¬Â•. Our editors reviewed thousands of Mandala images submitted by artists from all over the world and chose these 50 for our newest adult coloring book. To showcase the exciting world of Mandala coloring pages there is a variety of styles and line widths included ranging from extremely detailed to simple, yet elegant, designs. Printed on individual pages each image is printed as large as possible in this big 8.5 x 11 inch book and there is plenty of space at the top and bottom for color and medium testing.

Customer Reviews

The cover picture is included in this book and if you love the cover picture than you are going to love every single Mandala in this book. Every Illustration is a work of art, perfectly balanced, imaginative and fluid mandalas in circular form, just waiting for you to add color with Markers, Gel Pens or Colored pencils.A wonderful book to add to your coloring library or give as a gift to adults, college students, or school aged children.1. 50 circular mandalas printed one per page (the back of each page is blank) on medium weight, bright white paper.2. Each mandala is centered on the page and each averages 7 5/8ths wide.3. All markers leak through the pages in this book, I place a piece of paper under the page I am coloring to prevent damage to the next picture.

A wide selection is included, with growing skill levels. Very nice. I would like perforations near the

binding so they can be taken out evenly. I like to put them on clipboards to color. Thank you for your excellent product.

I really loved this coloring book. The sketches are dark and crisp and the perforated pages makes them easy to remove for coloring and framing. I definitely recommend this book because it is so relaxing and the pics are cool. I have loaded some of my best pictures that I have completed so far, hope you enjoy seeing them. I have been coloring for about three months and since I am disabled and retired I have more time to color. My pain ebbs during the time I am coloring and it seems to raise my appreciation for life higher. This coloring is highly recommended by me.

World’s Best Mandala Coloring Book has a good balance of tightly drawn patterns and more open patterns. It’s got a Hindu feeling to it, which makes it interesting and encourages me to use the strong, bright colors of India. One drawback is the thickness of the paper, which is thinner than any of the other coloring books I’ve gotten, almost as thin as standard copy paper, but I tear out the drawing and put a piece of thicker paper under it to protect my lap table. (I use fine Bic marking pens, 36 ct, and Sharpie ultra-fine, 24 ct., which do leak through.

This is my absolute Favorite Mandala Coloring Book.Best Coloring Book of any kind, actually.Coloring relieves stress. Its a zen-like hobby, more about the journey than the result. If you feel like getting perfect results, I’d suggest you not color for a while if you feel yourself getting hurried or impatient to finish an area- it’ll wait, just take note the color pen you are using, and pick that one up for the next time you are coloring that area.The designs in this specific book are perfect for the width of gel pens: the tiny details are just at the limit of the gel pens’ abilities, and wider areas still color up smoothly. You can use a lot of color variety, or just a bit, and you will always get a lovely result.Working the book more or less front to back, you can see how your skills a a colorist have naturally improved, as you go through the pages.I managed to lose this book for a week (under the couch, if anyone wonders.) Although I have several other very nice books, while this one was lost I missed it a lot: The results are just so beautiful, and the color application is especially relaxing and rewarding.The designs’ balance of ’noise’ to ’fun little details’ makes careful color application and a well chosen color palette really shine.If you don’t have any ideas for what colors to use, find a magazine ad you like the colors in, or anything where the colors looks "right" to you, and use colors drawn from that.Regarding "what colors will look best:" remember colors ’fade’ a bit as they dry. Wet colors appear more intense while wet. Quality Navy blue may look black going on, but

it will resolve itself once dry.I found it useful to sort out all my pens by color group, then make a small 3mmx3mm demo mark using each pen. I labelled each demo square with the number of the pen used to make it.The gel pens often don’t come numbered,so I numbered my pens myself, by running a strip of masking tape around the end of each pen, and labeling it with a number (1- how many pens I had.)This makes coloring in this book more rewarding and fun.If you are new to this, you’ll find that as your technical skill increases, your color applications will become more precise. That ups the "Wow!" factor, when people see the design you are working on/did.This book’s designs are good for per-planned color groups, or for ’choose as you go’ palettes (where you color, let dry, and review, then choose the next color from your result, color with that, and review, etc.)I think the best results I’ve gotten have been from the times I’ve just picked up a pen/color I especially enjoy using, coloring wherever that pen looked best, and then testing the way my sample page color squares look next to the result, choosing the next color from that, and so on. Its also an especially relaxing (journey not destination) way of coloring.Accents for mandala color blocks can of course came from any media that has color (colored pencils, crayons, and son on). Of course you can use anything for any part of the coloring.Ideas for enhanced success for those new to the hobby:1) You may want to keep a blank paper under your project, to catch tiny bits of bleed through from large areas.2)You may also find best results when you let the paper dry after filling larger areas, otherwise the paper tends to warp a little more than is acceptable.3) A blotter-like blank paper under your coloring hand as you go. Otherwise, you can easily transfer color to unintended areas from contact with still wet areas, or even transfer from just picking up and then setting down a slightly moist hand.Enjoy!

Paper is cheap! Cannot color on with gel pens. This is the first time I have ever had this problem and I buy A LOT of coloring books. Really disappointed. Hopefully someone at the manufacturers will read this and change it. It almost has a newspaper feel to it.

You get 50 fabulous designs in this book, Images are crisp and clear. The pages are white and good thickness. I use card stock between my pages if I want to use markers to be safe from bleed through. You can take the page and copy it also. These mandalas are not just round, there are may different shaped mandalas. This is the one you will go to over and over. Attention to detail is top notch. You really need to check this book out. I would recommend the book to anyone, novice to advanced colorist.

I got this as I love Mandalas but this one is not as good as others I have seen (or own). Some of the pages have a Mandala so intricate - and by intricate I mean have tiny lines with tiny color spaces- that they give me a headache just looking at them. Some others have wide color spaces along with small and then others are nice size. If you like small, closely spaced areas to color in this book is for you. If, like me, you wear glasses, this might not be a good one to choose.
