Synopsis

Now in its fourth edition and with a new title Ã¢â ¬â œ Injection Techniques in Musculoskeletal Medicine Ã¢â ¬â œ this successful step-by-step guide is a trusted resource used by a wide range of practitioners who have to deal with the management of painful joints and soft tissues, particularly in relation to sports and overuse injuries. Area by area, guidance is given for each lesion on appropriate patient selection and delivery of the drug. Every technique has its own two-page spread containing a written description along with an anatomical illustration of the region and a photograph showing the anatomical landmarks for the injection. This new edition is now accompanied by a Trainer available via www.injectiontechniquesonline.com. Please see log on for further details on how to accessÃ Â the virtual training guide - introduced by Stephanie Saunders herself - which covers the top most common injection techniques for each of the body regions. Through key text, videos, animations and interactive self-assessment, users are tested on their knowledge of anatomical landmarks, differential diagnoses, assessment criteria, drug selection and technical skill. Further access is given to a library of over 50 video clips showing supplementary injection techniques which clearly demonstrate the correct anatomical position for each needle insertion. Illustrations, references, lesions, drugs, controversies! Chapters on Other Injectable Substances; Landmark and Image Guided Injections Latest evidence in injection therapy literature Adapted and simplified practical sections Access to Musculoskeletal Injection Techniques Trainer Ã¢â ¬â œ a virtual aid to test your anatomical and technical skills on the top most common injections for the upper and lower limbs and spine Ã¢â ¬â œ perfect for self-testing and honing your skills! Log on to www.injectiontechniquesonline.comÃ Â to beginÃ Â The Trainer also gives unlimited access to a bank of over 50 video clips demonstrating actual needle insertion for each lesion

Customer Reviews

Speaking for my wife, who is a family practice doctor, she said "This book is the best." She does a lot of procedures in her practice and actually enjoys them very much. Certain injections were complex and she was not comfortable in attempting them. With this book as her reference, and her background, she has been able to do injections she never would have tried before getting and learning from this book. The most difficult she has learned to do is a carpal tunnel injection. She has the skills, but needed the technique and information from this book before attempting it. The injection went perfectly.

Covers many more injections than I would ever do comfortably in Family Practice, but is a helpful resource.

Well done. Easy to follow instructions. I wish the authors would give both kenalog and depo medrol dosing for the different injections. Otherwise well done. I have started to perform more injections for my patients to alleviate their pain instead of referring them to a specialist because of this book. It is definitely more cost effective for my patients to be receiving their injections from me.

Pretty easy book to follow along. In lieu of YouTube videos, it is a great resource for injections. It would get 5 stars if it had videos to go along with the pictures.

Great book on set up, including dose of lidocaine and steroids for injections for lots of musculoskeletal injuries. It’s given me confidence to do injections I haven’t done before and has helped me to be successful.

i was looking for , paid evern 400 on other material, this one finally excellent.

I am getting ready to graduate as an FNP and this was recommended to me by a DO I worked with in clinic. VERY helpful book when going to do injections. GREAT BOOK with GREAT PICTURES

Great!!! Gives you medications needed and explanation as well as pictures to perform the injections.
