Customer Reviews

Starting in the Exuma Cays, over a decade ago, Steve began his writing career with his guides to the many fascinating destinations he visited. Many of his books stand alone to this day as the quintessential guides to the areas he covers. His books are different than most other cruising guides in some very significant ways. All of the charts in Steve s books were created using data personally collected while visiting each area using a computerized system that interfaces GPS and depth soundings. The results are charts so accurate that they have been utilized by electronic navigational data providers to provide additional detail to supplement government produced charts.

This guide is a perfect complement to other guides, but it does have more information than most.

Maybe more quality pictures and photos would be good but all in all, the guide is an excellent planning tool for sailors planning a visit to the Leewards.
