Synopsis

The Force is strong with this series! Introducing a line of workbooks that marries the iconic popularity of Star Wars with the unique mix of editorial quality, fun presentation, and rigorous educational standards that Workman applied to the BRAIN QUEST Workbooks. Twelve titles launch the seriesÃ¢â ¬â •three each for Pre-K through 2nd GradeÃ¢â ¬â •and dig deep into core subjects, including numbers, ABCs, phonics, and reading readiness for younger grades, and math, reading, and writing for the older ones. The material, which aligns with national Common Core State Standards, is designed to reinforce essential concepts and lessons taught in schools. Any child, not just fans of Star WarsÃ¢â ¬â •but yes, those fans will be especially delighted (as will reluctant learners)Ã¢â ¬â •will love the Ã¢â ¬Å“AÃ¢â ¬Â• is for Anakin approach to phonics. Kids will practice learning numbers by counting and circling X-wing starfighters and clone troopers. Master place values by sorting groups of Wookiees. There are math problemsÃ¢â ¬â •Yoda is holding 7 lightsabers. 5 of the lightsabers are blue. The rest are green. How many green lightsabers is he holding? And Language ArtsÃ¢â ¬â •Circle the correct homophone in this sentence: Luke is a Jedi knight/night. Featuring favorite characters like Luke Skywalker, Queen Amidala, Yoda, and Obi-Wan Kenobi, and other creatures, monsters, Jedi, and Sith, the workbooks are filled with thousands of original illustrations drawing from all six Star Wars movies and the expanded Star Wars universe.Learn well, you will.

Book Information

Series: Star Wars Workbooks

Paperback: 96 pages

Publisher: Workman Publishing Company; Csm Wkb edition (June 17, 2014)

Workman Publishing Company has been producing award-winning calendars, cookbooks, parenting guides, and childrenÃ¢â ¬â„¢s titles, as well as gardening, humor, self-help, and business books, since 1968. From our What to ExpectÃ Â® pregnancy and parenting series and Page-A-DayÃ Â® Calendars to the iconic 1,000 Places to See Before You DieÃ Â® and Brain QuestÃ Â® children's products, our wide range of high-quality non-fiction titles and products inspire, educate, and entertain readers around the globe.

I was ecstatic to come across this workbook as I just started homeschooling my 5 yr old last year and I have two other boys ages 3,2. They are all OBSESSED with Star Wars. The only negative I will say is that the illustrations aren't amazing (they DO NOT look anything like the chewbacca pictured on the front! far from it actually) but if your kids are very familiar with Star Wars they shouldn't have a problem recognizing each character. Being able to read, of course, helps.The first half of the workbook focuses on number recognition... 1-20. Writing the number and a fun activity to go with it. Simple instructions that my 5 yr old (who just started reading on his own a few months ago) can understand and apply.Then here are some pages with groups of objects and practicing counting applying 'more or less.'Finally, there are numerous pages on addition and subtraction. Although the format is the same _+_=_ with quantities pictured above (child counts objects and writes number inside blank box) the characters and objects to be counted changes on every page. And, again, they are all in full color!!Overall, I think this is a very basic (especially for kindergarten) but very fun workbook!! My 5 yr old loves it and I'm happy that he looks forward to 'school time'

This whole line is a godsend. We homeschool our 6yo. All I have to do is lay out his work for the day and most days he will have it done before I'm even awake - he knows when it's done we can do fun science projects or go out and about. He is such an eager learner and a fan of this franchise that it isn't "homework." We have had parts of the series after we purchased them at a comic con a week after they were released. He can blow through the majority of common core standards for 1st grade and is really pushing through 2nd grade. It's made my life easier. We even donated some to a teacher friends classroom and she hasn't stopped raving about them.Only complaint I wish there were more, more topics more exercises, more everything.I would recommend if you are

homeschooling or just practicing with your little learner make a digital copy of the blank page because my guy has wanted to do them multiple times if he didn't get everything perfect.

This book is much thinner than other workbooks (like the brainquest ones). However, there is a good variety of activities- there are pages for learning to write numbers, some number games, coloring and circling different numbers, etc. There is some simple addition at the end of the book, but I feel like it is not presented in a structured way, just random addition of numbers. I like the Kumon books better for simple repetition to learn addition (like learning to add 1 or 2 to different numbers). BUT, my pre-K aged son is a HUGE star wars fan, and he absolutely loves this book and begs to do more "homework" every day. So that definitely makes up for most of the shortcomings.

My 5 year old will be staring Kindergarten soon so got this and the Writing & ABCs one for the summer. He seems to like it a lot as he finished it in 1.5 weeks. It keeps him interested and not too much coloring (he hates coloring). Would recommend it.

The little boy loved this. Good simple, fun extra practice but not an instructive lesson book. He always picked to do this one first though so yay for the Star Wars theme! Whatever makes him excited for math.

I have purchased several of these Star Wars workbooks for my 6 year old. He absolutely loves working in them, and they truly offer a fun learning experience. These books are wonderful teaching tools and have dozens of different types of activities in them, so your child will not get bored from repetitiveness.

Although the illustrations and math problems were as expected, the book came with water damage at the top of each page. My 5 year old, a star wars fan, was too excited about the book and would not have me return for a replacement. He finished it in 2 months, only working on it once or twice a week for 30-40 min each. This is by no means an assumption of the average.

This series works well. They are full of great lessons, and our kids are entertained by them enough to keep working. We call them their "fun books".
