Synopsis

Inspired by problems that spring from real life, Evidence presents the intricacies of evidence law in a way that law students will find both intellectually compelling and enjoyable. The author covers materials in detail, including relevance, reliability, and privileges. Whenever possible, problems are based on facts quoted from cases or news articles, complete with citations. This fact-based approach piques student interest, causing them to ask, How would a good lawyer attack this problem rather than What is the professor driving at. Written with the belief that students typically prefer to look at the courtroom world through the criminal law lense, the casebook emphasizes the criminal context, while using civil cases when illustrating rules that apply mainly in the civil context.

Book Information

Series: University Casebook
Hardcover: 1047 pages
Publisher: West; 2 edition (August 12, 2008)
Language: English

Customer Reviews

Professor of Law, Stanford Law School.

For the 0 people looking at this book just for fun and not because it’s required for a class, It’s well written and a reasonably interesting read.

excellent book to have as reference and for law school studentsthe book is in excellent condition and the price was the best partI recommend the seller

the cases are clear, the notes are clear, it’s easy to read... this is a great casebook for learning

evidence.

everything i expected

This is a fantastic textbook for teaching evidence. It is divided up very clearly and goes through the rules and doctrines one by one with cases that are on point and well edited. The font size is nice. The book also lays out charts and well-organized discussions to explain some of the more complex areas. And thankfully, it doesn't waste your time with philosophical discussions about the nature of truth/proof or a "more perfect law" that are of littleinterest to the student seeking to prepare for the exam. Nor does it have little notes directing you to hundreds of other cases that you will never read.I highly recommend this book

It is what is says it is. Almost exactly the same as the newer edition.

Are other people in law school really too dumb to review books in the book review box? People don't care if there were more notes in your used textbook than you thought there would be, or if the shipping was slow. This is a place to review books.This was a fantastic evidence book, and the best casebook I had in any law school class by far. It first goes over each evidentiary rule, then gives plentiful examples to illustrate the rule. It is like a casebook and evidence study guide combined. I never had any say in which casebooks I used, but if you're able to request a specific casebook, request this one.

This is the best legal textbook I've ever used, hands-down. The writing is straightforward and clear, and the examples are interesting and well-written. Really a marvelous tool for teaching and learning evidence. I've read many of the alternatives as well, and they can't hold a candle to Fisher in terms of writing, clarity, or organization.
